

ABP
INDUCTION

Services

Repairs

We have an eventful history: ASEA, BBC, ABB... There are induction systems from different generations (IT, SCC, ITMK, IFM, FS etc.) on the market – in tried-and-trusted successful operation for decades. Of course, we offer repairs for our entire range of systems.

We also apply our extensive experience and expertise to third-party systems, so that you always receive a high-quality repair.

If you operate system components from other well-known manufacturers, the familiar competence of ABP Induction is still available to you. We are able to offer you the necessary repairs or mechanical modernizations.

- Precise fault analysis and elimination of the cause
- Fast help with getting the system back up and running
- High quality and comprehensive expertise
- Know-how transfer from the improvements related to new system construction
- Our performance is confirmed by ISO 9001 certification
