

## Expand your knowledge now – digitally, in the ABP VIRTUAL ACADEMY

Dear Ladies and Gentlemen,

learn more about the digital trainings of the ABP VIRTUAL ACADEMY. In addition to individual, closed trainings for ABP clients, we also offer open seminars and lectures in the ABP VIRTUAL ACADEMY. Discover all the dates in our seminar calendar now – and book your digital ticket for the next virtual training right away.

This is what it looks like in our Virtual Academy: Discover the digital training environment in our feature video now!

Our digital trainings can be virtual trainings, but also exercises (currently in German, English and French) and sessions in the ABP Virtual Classroom. Here you can currently find dates for productivity and safety topics in the foundry environment or specifically for our Prodapt solution, for example.

All dates are stored in the new ABP Induction seminar calendar. There you can browse through the dates, find topics and dates and register directly online. Also available in the future will be the "ABP Meet the Experts" certification programme, with which you can prove your expertise after successfully attending our events.

Do you already know ABP VIRTUAL TRAININGS? They are another important part of the ABP VIRTUAL ACADEMY. Here you can plan important actions, work steps and emergency measures – independent of location, at any time, on a virtual twin of a plant. Contact our VP Service Products & Digitalisation, [✉ Markus Fournell](#), who will be happy to take you on a digital journey in a DEMO!
